

IN THE DRAWING:

Please amend drawings 1 to 3 as the attached. In the amendment of the drawings, they are indicated with "PRIOR ART". No new matter is added.

## **REMARKS**

Very thanks for Examination's suggestion and thanks for finding some citations about the present invention, thereby, the applicant may know  
5 more information about the invention. This case has been carefully reviewed and analyzed in view of the office action. All details of the reference prior arts are fully considered and compared with the present invention.

### **ABOUT THE REJECTION SPECIFICATION**

Please add the following paragraph to be between the 2<sup>nd</sup> and 3<sup>rd</sup> paragraphs of the DETAILED DESCRIPTION OF THE INVENTION as the following. The amendment is based on the suggestion in the office action. No new matter is added.

### **ABOUT THE REJECTION OF DRAWINGS**

Please amend drawings 1 to 3 as the attached. In the amendment of the drawings, they are indicated with " PRIOR ART". No new matter is added.

### **ABOUT CLAIM REJECTION OF 35USC103**

Indeed the citations disclose some features of the present invention, and the applicant agrees with these viewpoints, however applicant discovers that some main features of the present invention are not  
25 disclosed in the citation which can form the novelty and inventive step of the present invention.

To illustrate the novelty of the present invention and overcome

the objection from the citations, the applicant decides to Claims 1 and 2, without prejudice or disclaimer of the subject matter thereof and add claim 3 as the following. The claim 3 is based on Figs. 10 and 11 of the present invention.

5

## **DISCUSSION ABOUT THE NOVELTY THE PRESENT INVENTION**

### **(A) For the citation USP**

The new claim 3 is based on the Figs. 10 and 11 of the present invention. In the new claim 3, we define the brake disk C into the present invention so as to make the present invention different form the citation USP4996859. Referring to Fig. 6 of the present invention, the disk 10 is engaged to the seat 56, but the structure of the seat 56 is different from the present invention. The seat 56 has only one cylinder without any groove (as the groove 90 of the present invention) and no thread (as the thread 71 of the present invention).

Thus the inner cylinder 46 and outer cylinder 73 of the disk 10 in the citation '085 are not received in any groove.

(B) Referring to the following drawings, it is illustrated that the present invention is the portion illustrated, while the citation 4996859 relates to a method and apparatus for roll forming metal parts and to novel an improved articles formed by such method. They are very different. The

### **(C) RESULT**

Since in above discussion, it is apparent that no prior art has the features of the present invention, especially in new claim 3. Furthermore, as we know that no other prior art has features of the present invention. Thus, the present invention is novel and inventive.

If there is any error in the specification, or claims, applicant requests and authorizes Examiner to amend the claims, specification and drawings of the present invention so that they can match the requirement of U. S. Patent. Attentions of Examiner to this matter are greatly appreciated.

It is now believed that the subject Patent Application has been placed in condition for allowance, and such action is respectively requested.

10

Respectfully submitted,

Po Ta Lee
